## PROFESSIONAL EXPERIENCE

**Developer**                                                December 2007 – Present

*Rokkan*

As a developer I am an integral core developer for all CMS projects and Multi-Lingual/ Multi-Country development. With a background in Unit Testing and Tested Development cycle we have been able to maintain a low failure rate for our development cycle and have been able to meet release dates.  I have made fully custom content management systems with the use of the Zend Framework as well as pure PHP depending on the level of customization.

**www.theopenroad.com (2008)**

Kiehl's Facebook promotional Application. This application was both a Facebook application as well as a stand alone web application. This was a core PHP application with a custom PHP CMS, fully intergraded with Facebook.

**www.cuervo.com (2009)**

Jose Cuervo® Official Brand Site. The purpose of this site was to introduce the history and the nature of Jose Cuervo to the public. This site was built on MS C#.NET and intergraded with Flash elements.

**www.virgin.com (2009)**

Virgin® Brand Site. The purpose of the site is to have a centralized portal for all their brands and build a community around the brand. This site has a fully intergraded CMS, advertisement management, Facebook Connect, and Amazon S3. This site was built on Zend Frame work.

**www.gamecheats.com (2008)**

This is a UGO® brand site tailored to game cheats and the UGO network. This site was a fully functional CMS, and custom advertisement network. The site was build on Zend Framework.

**www.mamashelter.com (2008)**

This is a hotel advertisement site, the purpose of the site is to promote Mama Shelter as a brand and as a Artistic Hotel.  This site is multi-lingual for English and French. Complete sales and promotion management, slideshow management. We have an intergraded weather module. This site was built with Zend Framework, Custom JQuery Plug-ins.

**www.umbro.com (2009)**

This is a brand site for Umbro. The purpose of the site is to have  a new edge to soccer sports wear and a place where the visitor can get everything Umbro related. This site serves 19 different language each managed by market through the custom CMS. This site is built with Zend Framework, Flash, and intergrades with Akami Cache management. The site is completely controlled through the custom CMS.

**KLS Activity Manager**                                      November 2004 – December 2007

*National Kidney Foundation*

Developed and designed applications for Palm and Pocket PC.

Maintained Continuity within departmental roles.
